

VOTRE TOUR OPERATEUR DES ÎLES
TURQUOISE

Dominica has been nicknamed the "Nature Isle of the Caribbean" and is also known as the hidden jewel of the Caribbean.

The island boasts a variety of natural attractions including 365 rivers and streams, hidden waterfalls, freshwater lakes, hot sulfur springs, a boiling lake (considered the world's second largest), lush mountainous tropical forest, and it is the home of many rare plants, animals, and bird species.

The island of Dominica differentiates itself in many ways from other Caribbean islands; instead of mass tourism, noisy bars and night clubs, visitors will find tranquility, plenty nature and very friendly people. A dream for eco-lover's, adventurer, hikers, divers and bird watchers.

Jungle Bay is a unique oasis for nature lovers, individualists, active and adventurous travelers, as well as for those who seek tranquility, relaxation, yoga and wellbeing. A place to wind down, to rejuvenate your mind and body in a natural environment.

Jungle Bay is located on the south west coast, only 20 minutes from the capital of Roseau, 392 feet above the Caribbean Sea, the charming fishing village Soufriere and the marine sanctuary of Soufriere & Scotts Head.

The 60 tastefully designed villas are nestled within tropical trees, banana plants and flowers. The hotel combines barefoot luxury with ecologically & socially responsibility and offers an outstanding hospitality service.

Everything will be organized for you: transfers (from/to port/airport), guided hikes, excursions & activities, spa treatments & massages, yoga, delicious and fresh island meals. The Jungle Wellness Adventure Package includes all of these benefits plus luxury accommodations in a natural environment.

Dominica's underwater terrain is as diverse as the island's terrestrial areas with a wide variety of marine life and dramatic underwater features including sunken volcanoes and deep drop-offs. You can explore 16 dive sites in the Soufriere Scotts Head Marine Reserve and some of them – according to experienced divers – are among the top sites in the entire Caribbean! All 16 dive sites are less than 15 boat minutes from the dive shop. One of the most popular snorkeling sites is Champagne Beach; at which tiny, warm bubbles float up from the geothermal vents, resembling a glass of bubbly Champagne.

Dominica is also known as the Whale Watching capital of the Caribbean; more than a half-dozen types of whales and a dozen types of dolphins have been identified in Dominica's waters.

Remember to bring comfortable hiking clothes as well as shoes with good grip and that can get wet (river crossings).

Award winning Jungle Bay overlooks the Caribbean Sea and the highly biodiverse Soufriere Scotts Head Marine Reserve with world-class snorkeling and scuba diving

ACTIVITIES

Adventure tours & hikes
Waterfall excursions
